HOW IT WORKS

01 | Consultation

We can meet in your home or connect virtually, creating dedicated time to review your plans, ideas and current progress in detail. Together, we'll work through layouts, finishes and design choices, discussing how you want your home to feel and function - Giving you clear, practical guidance to move forward with confidence.

02 | Initial Ideas Concept

You'll receive a tailored ideas concept that brings your vision into focus, supported by clear direction on how the elements can work together. This will help you visualise the overall feel of the space and understand how each choice connects to create a cohesive, well-balanced result.

03 | Refinement

We revisit the concept together, taking time to question, refine and adjust the finer details. Through thoughtful discussion and careful consideration, we evolve the scheme until it feels cohesive, well-balanced and fully aligned with both your vision and the practical needs of your home.

04 | Final Specification

Your final ideas specification will provide clear, practical recommendations, including suggested finishes and sourcing direction to help you move forward with confidence. Should you wish, this support can also continue alongside you, offering guidance throughout the entirety of your project.
